

255...How to WRITE SONG LYRICS It's 258

DIRECTED BY NICK AUSTIN Unnecessary

hello today on how to video **spelling** we will be exploring the idea of how to write song lyrics....

FORMATTING AND GRAMMER

music is the key to the heart but music is even better when there are words being sung alongside the music so what you do is you need to write them **What? This doesn't make sense**

what you need is yourself and a great singing voice **You don't need this. Pen and paper, laptop, etc.**

step 1

think of something inspiring that would help you write a song **Like what??**

step 2

go to a place you can write without hearing loud distractions **?????** all over the place

step 3 **Double check things like this before sending these to me**

do not get angry when ideas dont come because yhey will **What to do if you get angry? Elaborate elaborate elaborate**

step 4

when ideas come write them down. its good idea to make sure the words rhyme with eachother so that way you have a whole song . **Unspecific nonsense**

step 5

sing the lyrics out loud to make sure they sound good. **Whats good?** its a good idea to play music you written earlier behind the singing so it sounds more like it will later **What music? What?**

step 6

show the lyrics to a friend to see if there as gogod as you think **Then what? What kind of friend?**

Step 8 **What happened to 7?**

play your song with the whole band behind you (we will get a band in and they come in with instruments and stuff and maybe an audience as well so you can hear us play the song) **What? How do you suppose we do this? What audience? What band? What instruments? You haven't even written a song so I'm not sure what you plan to perform. Omit this.**

and thats it you now have a song to share with all your friends and family and the sectet is that **ehicks girls** really dig people who can write songs because it shows your sensitive (even if your not)

~~next week is how to write music~~ **Next week we will be learning how to write music. Until then, don't forget to X**

Ridiculous and unfinished. This is not 'nearly there'.

Failings in basic grammar and spelling, **terribly unprofessional.** Microsoft Word highlights these for you, which is why I'm sending this back as a word document and not as the text document you sent me.

Formatting not up to standard. You need to write these scripts in Microsoft Word, which is pre-installed on all employee laptops. Title and steps need to be bolded, and you need to refer to the style guide provided to you.

Remember scope. We do not have time for live bands, nor is that what this is about in the slightest.

It's insane that I have to explain these things. **Be better.**
